* A combination framework is included in this section for programs on this list.

** A separate framework is included in this section for each program (major) on the list.

BUSINESS TRANSFER FRAMEWORKS

Course Selection and Advising Information for Business Students

Students are advised to contact the business program at the institution to which they plan to transfer as early as possible. While the Business Transfer Framework will allow students to make progress toward a degree, some individual business programs, e.g., accounting, finance, marketing, require particular lower division courses beyond the Transfer Framework. Such courses may include calculus and other mathematics courses, advanced writing, legal environment of business or business law, and accounting for accounting majors.

Depending on the general education requirements of the **sending** institution, the mathematics and advanced writing courses may also meet the Institutional General Education requirements. Early selection of a specific program and contact with the receiving university will permit more efficient planning of the student's degree program.

Eligibility for admission to baccalaureate business programs vary from one university to another. Typically, a minimum grade point average greater than 2.0 (4.0 scale) is required. Completion of a specified set of foundation courses (pre-major and/or core) is also generally required prior to admission. Many, but not all, of these courses are included in the Business Transfer Framework. Some foundation (pre-major and/or core) courses are only taught at the upper division level and lower division courses cannot be substituted.

Minimum grades are required in some courses. For example, some institutions require at least a "C" in the accounting courses included in the Business Specialty segment. In other cases, the grading policy of the receiving institution requires that courses in which a "D" grade was earned at the sending institution must be retaken at the receiving institution.

BUSINESS (Combined Framework) -- CIP 52

General Education Transfer Component (33 hours) + Institutional General Education (15 hours) = General Education Total (48 hours)

General Education Total (48 hours) + Specialty (12 hours) = Transfer Framework (60 hours)

NOTES: A shaded column indicates the college or university does not confer a baccalaureate degree in this program.
However, course numbers in shaded columns indicate that the transfer framework may be completed at that institution.

The General Education Transfer Component should be completed according to the general education requirements for this major at the sending institution, unless specific course recommendations are listed.

General Education courses may also be counted toward the major, a minor, or a second major.

An 'S' below indicates the program has restricted and/or limited admissions. The program may require an additional application process or have specific grade point average requirements for application and/or acceptance. Consult the college or university catalog for complete information about program requirements.
